CONTENTS

Volume 21, Issue Nos 1–15

International Journal of ENERGY RESEARCH

Issue No. 1 JANUARY

Heat Pump Dryer. Part 2: Results of the Simulation: S. Prasertsan, P. Saen-Saby, P. Ngamsritrakul and G. Prateepchaikul 1

Butanol – A Single Cylinder Engine Study: Engine Performance: F. N. Alasfour 21

Experimental Investigation on Varying the Compression Ratio of SI Engine Working Under Different Ethanol–Gasoline Fuel Blends: A. A. Abdel-Rahman and M. M. Osman 31

Moisture Evaporation and Migration in Thin Porous Packed Bed Influenced by Ambient and Operating Conditions: W. Liu, S. W. Peng and K. Mizukami 41

Design and Performance Analysis of a Metal Hydride Air-conditioner: M. R. Gopal and S. S. Murthy 55

Numerical Analysis of Molten Carbonate Fuel Cell Systems: W. He 69

Experimental Studies on Flow in Convergent and Divergent Ducts of Rectangular Cross Section: C.-C. Su and R.-H. Lin 77

Effects of Transverse Magnetic Field, Prandtl Number and Reynolds Number on Non-Darcy Mixed Convective Flow of an Incompressible Viscous Fluid Past a Porous Vertical Flat Plate in a Saturated Porous Medium: H. S. Takhar and O. A. Beg 87

Issue No. 2 FEBRUARY

Performance of a Heat Pipe Thermosyphon Radiator: F. F. Jebrail and M. J. Andrews 101

Analysis of a Concept for Increasing the Efficiency of a Brayton Cycle via Isothermal Heat Addition: J. Vecchiarelli, J. G. Kawall and J. S. Wallace 113

Application of the PSTAR Method to a Massive Test Cell for Thermal Performance Evaluation: W. G. Chun, M. S. Jeon, H. K. Yoon, H. S. Jeon and P. C. Auh 129

Experimental Performance of the System Water/Magnesium Chloride in a Heat Transformer: R. M. Barragán, V. M. Arellano, C. L. Heard, R. Best and F. A. Holland 139

Energy and GDP: I. Dincer and S. Dost 153

Large Building Cooling Load and Energy Use Estimation: S. K. Chou and W. L. Chang 169

Investment Planning for Electricity Generation Expansion: S. Pokharel and K. Ponnambalam 185

Effect of Solar Collector Design Parameters on the Operation of Solar Stirling Power System: N. Singh, B. M. Gibbs and S. C. Kaushik 195

Issue No. 3 MARCH

Kinetics of Chloroform Extraction of Tar Sand: Y. H. Khraisha 201

Exergetic Evaluation of Gas Turbine Cogeneration Systems for District Heating and Cooling: P. S. Pak and Y. Suzuki 209

Performance Analysis of Vapour Compression Refrigeration with R22/R124/R152A Refrigerant: T. Kiatsiriroat and K. Na Thalang 221

Heat Transfer Optimization of a District Heating System using Search Methods: D. K. Baker and S. A. Sherif 233

Energy Balance of Different Internal Reforming MCFC Configurations: S. Freni and G. Maggio 253

Evaluation of the Dynamic Performance of a Hot Water Tank with Built-in Heating Coil: L. Yang, B. Bohm, O. Paulsen and S. Frederiksen 265

Experimental Performance of Built-in-storage Solar Water Heating Systems in Laboratory and Field Conditions: M. S. Sodha, A. K. Sharma, R. L. Sawhney and A. Kumar 275

An Estimation of Environmental Costs of Coal-based Thermal Power Generation in India: S. C. Bhattacharyya 289

Issue No. 4 MARCH

Energy–Environment Implications of Cement Manufacturing in India: A Scenario Analysis: A. Das and T. C. Kandpal 299

Rice Processing in India: A Generalized Framework for Energy Demand Estimation: T. Kapur, T. C. Kandpal and H. P. Garg 309

Thermal Comfort Analysis Inside a Car: W. Chakroun and S. Al-Fahed 327

An Optimization Model for Energy Supply to Rice Mills in India: T. Kapur, T. C. Kandpal and H. P. Garg 341

Unsteady Convection Flow Through a Pipe of Variable Gap Induced by a Travelling Thermal Boundary Wave: Y. Purushothama Reddy, D. R. V. Prasada Rao and D. V. Krishna 359

Limit of Equivalence Ratio on Mixing Enhancement Near the Tube Exit in a Tone Excited Rich Flame: J. K. Kim and H. D. Shin 377

Assessing New Energy Technologies Using an Energy System Model with Endogenized Curves: N. Mattsson and C.-O. Wene 385

Issue No. 5 APRIL

A Methodology for Tunnel Dryer Chamber Design: S. K. Chou, M. N. A. Hawlader, K. J. Chua and C. C. Teo 395

Study of Charging of Stratified Storage Tanks with Finite Wall Thickness: N. K. Ghaddar and A. M. Al-Maarafie 411

The Implications of Energy and Other Input Use for Conservation Tillage: N. D. Uri 429

Industrial Use of Biomass Energy in Sri Lanka: A. S. Tariq and M. R. Purvis 447

Issue No. 6 MAY

Sizing and Techno-economical Optimisation for Hybrid Solar Photovoltaic/Wind Power Systems with Battery Storage: C. Protogeropoulos, B. J. Brinkworth and R. H. Marshall 465

Adsorption Heat Pump Using HFC Refrigerants: M. D. Williams, S. B. Riffat and S. Corr 481

An Evaluation of the Economics of Fuel Cells in Urban Buses: G. Hormandinger and N. J. Lucas 495

Energy Planning and Optimization Model for Rural Development: R. Raja, C. E. Sooriamoorthi, P. Kanniappan and T. Ramachandran 527

Solar Assisted Open-cycle Absorption Cooling: Performance of Collectors/Regenerators: M. A. Hawlader, B. D. Wood, C. C. Folkman and A. P. Stack 549

Issue No. 7 JUNE

Equation of State for 1,1-Difluoroethane (R152a): Y. Kim, C. Borgnakke and R. E. Sonntag 575

Solar Conversion Parameters of Graded Base Silicon Solar Cells: R. B. Gangadhar, R. K. Sharma and N. D. Kaushika 591

Numerical Simulation of an Ethylene Re-Liquefaction Plant: J. A. Parise, E. C. Berlinck and R. P. Marques 597

Propane/n-Hexadecane Resorption Cycle for Air-Conditioning Applications: E. D. Rogdakis and K. A. Antonopoulos 615

Application of Heat Pump Systems for Energy Conservation in Paper Drying: K. Abrahamsson, S. Stenstrom, G. Aly and A. Jernqvist 631

On Exergy and Environmental Impact: M. A. Rosen and I. Dincer 643

Effect of Pollutant Oscillations on Oil Spreading on the Sea: T. M. Abbey, J. O. Amakiri and A. R. Bestman 655

New Fourier-Reynolds Correlations for Refrigeration Applications: I. Dincer 661

Domestic Hot Water Consumption in South African Houses for Developed and Developing Communities: J. P. Meyer and M. Tshimankinda 667

CFD Prediction of K-Factors of Duct Elbows: G. Gan and S. B. Riffat 675

Issue No. 8 JUNE

Bond Graph Modelling and Simulation of Spice-Pounding Machines fed from Photovoltaic Sources: V. N. Madansure, S. Banerjeee, A. Mukherjee and P. K. Chattopadhay 683

Design Consideration for Cross Jet Air Mixing in Municipal Solid Waste Incinerators: C. K. Ryu and S. Choi 695

Heat Pump Dryer Part 3: Experiment Verification of the Simulation: S. Prasertsan, P. Saen-Saby, P. Ngamsritrakul and G. Prateepchaikul 707

Calculation of Solar Radiation Intercepted by Nubian Vault and Dome Shaped Buildings: N. K. Bansal, Shail and S. N. Garg 723

Exergetic Evaluation of Methods for Improving Power Generation Efficiency of a Gas Turbine Cogeneration System: P. S. Pak and Y. Suzuki 737

Characteristics of a CO_2-Recovering Combined Cycle Power Generation System When its CO_2 Recovery Rate is Changed: P. S. Pak and Y. Suzuki 749

Issue No. 9 JULY

Enhancing the Thermal Response of Latent Heat Storage Systems: I. M. Bugaje 759

Changing the Management Perspective on Energy Systems: How Small Clusters—and Islands—Can Achieve Greater Cost and Energy Efficiencies: D. Fielden and J. K. Jacques 767

Load Management in Municipal Electricity Systems: S. Gustafsson 787

The Transient Response of an Evaporator Fed Through an Electronic Expansion Valve: A. Outtagarts, P. Haberschill and M. Lallemand 793

Water Recovery from the HAT Cycle Exhaust Gas: A Possible Solution to Reduce Stack Temperature Problems: U. Desideri and F. Di Maria 809

A Feasibility Study of a Solar-Assisted Heating/Cooling System for an Aquatic Center in Hot and Humid Climates: A. I. Alkhamis and S. A. Sherif 823

The Impact of the Proposed Reduction in the Motor Fuels Excise Tax in the United States: N. D. Uri and R. Boyd 841

Issue No. 10 AUGUST

Performance and Economic Feasibility of Ground Source Heat Pumps in Cold Climate: P. F. Healy and V. I. Ugursal 857

Thermodynamic Property Formulations and Heat Transfer Aspects for Replacement Refrigerants: R-123, R-134a: A. Stegou-Sagia 871

Distributed Cogeneration Can Have a Very Meaningful Strategic Energy Conservation Outcome for Islands: D. Fielden and J. K. Jacques 885

A Hot-Flow Model Analysis of MSW Incinerator: J. Han, K. Jeong, J. H. Choi and S. Choi 899

A Trilateral Brokerage System for Power Transactions: C. Chen and K. J. Min 911

Photocatalytic Reduction of Carbon Dioxide Over Ferrocyanide Coated Titanium Dioxide Powder: B. K. Sharma, R. Ameta, J. Kaur and S. C. Ameta 923

Effect of Operating Parameters on Heat Transfer in the Lean Phase Region of a CFB Riser Column: B. V. Reddy and P. K. Nag 931

Optimum Thermal Design of Office Buildings: M. S. Al-Homound 941

Issue No. 11 SEPTEMBER

Chosen Set of Capital Investments Can Greatly Influence Energy Service Tariff Levels: D. Fielden and J. K. Jacques 959

Thermodynamic Analysis on the Performance of a Solar Absorption Heat Transformer at Maximum Coefficient Performance: J. Chen 975

CFD-Simulations on a Coal-Coal Reburning Test Facility: R. S. Vonderbank 985

A Techno-Economic Analysis Between the Performance of Air- and Horizontal- Ground-Source Air-conditioners in South Africa: P. J. Petit and J. P. Meyer 1011

Development of Design Charts for Tunnel Dryers: M. A. Hawlader, S. K. Chou and K. J. Chua 1023

Performance Comparison of High-temperature Packed Bed Operation with PCM and Sensible-heat Pellets: A. A. Jalalzadeh-Azar, W. G. Steele and G. A. Adebiyi 1039

Exergy Diagrams for Nitrogen on ITS-90: R. R. Rao and K. Srinivasan 1053

Issue No. 12 OCTOBER

The Influence of Low Operative Temperature on Molten Carbonate Fuel Cells Decay Processes: S. Freni, E. Passalacqua and F. Barone 1061

Energy Efficiency Analysis of a New Ternary HFC Alternative: S. M. Sami, B. Song and B. Poirier .. 1071

Domestic Hot-water Consumption by South African Developing Communities Living in Shacks: J. P. Meyer and M. Tshimankinda 1081

R407C as an Alternative to R22 in Vapour Compression Plant: An Experimental Study: A. Greco, R. Mastrullo and A. Palombo 1087

Recent Research on an Indirect Evaporative Cooler (IEC) Part I: Optimization of COP: T. R. Tulsidasani, R. L. Sawhney, S. P. Singh and M. S. Sodha 1099

Axial and Radial Heat Transfer Studies in a Circulating Fluidized Bed: B. V. Reddy and P. K. Nag .. 1109

Experimental Investigation of Solar Concentrating Collectors in a Refrigerant Ejector Refrigeration Machine: N. Al-Khalidy 1123

Phase Equilibrium Analysis Using Cubic Equation of State: M. A. Al-Nimr 1133

A Simple Model for Estimation Monthly Mean Daily Sums of Solar Irradiation and its Local Distribution: M. Skiba, M. Mohr and H. Unger 1145

Performance Analyses of Sensible Heat Storage Systems for Thermal Applications: I. Dincer, S. Dost and X. Li 1157

Experimental Investigation of the Performance and Exhaust Emissions of a Swirl Chamber Diesel Engine Using JP-8 Aviation Fuel: D. A. Kouremenos, C. D. Rakopoulus and D. T. Hountalas 1173

Iron and Steel Manufacturing Technologies in India: Estimation of CO_2 Emissions: A. Das and T. C. Kandpal 1187

Issue No. 13 OCTOBER

Recent Research on an Indirect Evaporative Cooler (IEC). Part 2: Thermal Performance of a Non-conditioned Building Coupled with an IEC: T. R. Tulsidasani, S. P. Singh, R. L. Sawhney and M. S. Sodha 1203

Waste Heat Utilization in a Ceramic Industry: S. Akter and I. Hossain 1215

Analysis of a Latent Heat Cold Storage Unit: K. A. R. Ismail and M. M. Conçalves 1223

PCM Glazing Systems: K. A. R. Ismail and J. R. Henríquez 1241

Performance of a Geared Dehumidifier: B. Bansal, P. Bannister and C. G. Carrington 1257

The Adjoint-Solution Technique for the Calculation of the Termal Properties of Layers in Multilayer Walls Under Transient Heat Conduction: K. A. Antonopoulos and M. Vrachopoulos 1261

Recent Research in Indirect Evaporative Cooler IV: Effect of Recirculation on Cooling of a Room Coupled to an Indirect Evaporative Cooler: T. R. Tulsidasani, R. L. Sawhney, S. P. Singh and M. S. Sodha 1277

Issue No. 14 NOVEMBER

PCM Thermal Insulation in Buildings: K. A. R. Ismail and J. N. C. Castro 1281

Heuristic Approach for the Synthesis of Heat-integrated Distillation Sequences: S. Aly 1297

Flow Boiling and Condensation of Tetrary Refrigerant Mixtures Inside Water/Refrigerant Enhanced Surface Tubing: S. M. Sami and B. Song 1305

A Statistical Method to Evaluate Urban Energy Needs: C. Balocco and G. Grazzini 1321

Modelling and Validation of the Formation and Oxidation of Cenospheres in a Confined Spray Flame: J. Yuan, V. Semião and M. G. Carvalho 1331

Use of Azine Dye as Photosensitizer in Solar Cells: Different Reductants—Safranine Systems: K. M. Gangotri and Om Prakash Regar 1345

Issue No. 15 DECEMBER

Heat Transfer to a Horizontal Tube Bundle Located in the Freeboard of a Bubbling Fluidized Bed Combustor: A. H. Abdel Hafez, F. M. El-Mahallawy, S. G. Sharobeem and Z. S. Safar 1351

Development of an Energy-efficient Brick Kiln: S. Prasertsan, T. Theppaya, G. Prateepchaikul and P. Kirirat 1363

Unit Commitment with Voltage Constraints: S. M. Shahidehpour and H. Ma 1385

Effect of Coriolis Force on Vorticity Covariance in MHD Turbulent Flow of Dusty Fluid: M. S. Alam Sarker 1399

Performance Investigation of a Hydroelectric Power Station at Batang AI-Sarawak: S. Al-Zubaidy and A. Rigit 1405

Recent Researches in Indirect Evaporative Cooler V: Relative Thermal Performance of Buildings Coupled to Direct and Indirect Evaporative Coolers: S. P. Singh, T. R. Tulsidasani, R. L. Sawhney and M. S. Sodha 1413
